

2.2.2 Amount of Expenses for Procedures

2.2.2.1 Expenses for Procedures

Classification			Unit	Amount of Expenses for Procedures	Remarks			
(1)Expense for procedure related to installing a PHS communications circuit for public cell station	The expense for the procedure to install the communications circuit for a public station by a PHS carrier (dependent-type)		Per line	An amount equivalent to the contract charge defined in NTT's articles of agreement for telephone service	Applied to PHS carriers (dependent-type)			
(2)Expense for procedure related to charge collection	The expense required for the collection of user charges by NTT when NTT becomes the carrier billing user charges in Column 3 of Attached Table 2 (Patterns of Interconnection) under the pattern of interconnection in which a contracting carrier becomes the carrier setting user charges.	a. Cases other than "b"	(a) Cases in which billing item(s) in the bill to the user are exclusively used by a single contracting carrier and in which NTT conducts billing and collection	Per billing item	¥24.50 ¥24.33	Applied to the specified long-distance carrier		
				Monthly charge	An amount equivalent to 0.15% 0.12% of user charges billed by NTT			
		b. Cases of call origination from public telephones of NTT (limited to cases in which the person required to pay the relevant charge is the user of the public telephone)	(b) Cases in which itemized charges in the bill to the user are payable to multiple contracting carriers and in which NTT conducts the following per call: accumulating data, calculating charges, determining the billing amount, billing and collection	Monthly charge	Monthly charge	An amount equivalent to 3.9% 4.0% of user charges billed by NTT	Applied to mobile carriers, dependent-type PHS carriers and connective-type PHS carriers	
						(i) Monthly charge	An amount equivalent to 14.0% of user charges collected by NTT	Applied to mobile carriers, PHS carriers (dependent-type), local carriers connecting with a PHS carrier, and the specified long-distance carrier
						(ii) Monthly charge	An amount equivalent to 11.39% of user charges collected by NTT	Applied to international carriers and satellite communications carriers.
						(3) Expense for procedure related to listing in telephone	The expense required for listing contracting-carrier subscriber line numbers,	a. Cases of listing in a telephone directory in the order of the Japanese syllabary

directory	etc. in a telephone directory of NTT	b. Cases of listing in a telephone directory by type of business	Per listing per issuance	<u>¥312</u> <u>¥284</u>	—	
(4) Deleted	—		—	—	—	
(4) Expense for procedure related to directory information database registration	a. When a request is made by a contracting carrier for the registration of the subscriber number information that is provided in a paper format in the directory information database, the expense required to register such number information in the directory information database		Per number per registration	¥199	—	
	b. When a request is made by a contracting carrier for the registration of possible call origination areas related to the subscriber number information that are provided in a paper format in the directory information database, the expense required to register such information in the directory information database		Per number per registration	¥149	—	
(5) Expense for procedure related to preparation of Customer Information Referral Form	The expense required for procedures to provide subscriber information such as the subscriber line number, etc. and the subscriber line installation location, etc. pursuant to Article 98 (Providing Subscriber Information to Contracting Carriers with Individual Subscriber Contracts) or Paragraph 3, Article 99 (Providing Subscriber Information to Contracting Carriers with Assumed Individual Subscriber Contracts).		Per case	<u>¥246</u> <u>¥241</u>	Applied to long-distance carriers and international carriers.	
(6) Expense for procedure related to conclusion of usage contracts	The expense for procedures in cases in which the conclusion of subscriber telephone contracts, Members' Net contracts or ISDN service contracts with NTT is assumed to represent the conclusion of telecommunications service contracts with contracting carriers.		Per case	¥6	Applied to contracting carriers with assumed individual subscriber contracts.	
(7) Expense for procedure related to assumption of account receivable	The expense required for the collection of user charges by NTT when NTT assumes all claims to user charges for the service segment of a contracting carrier from	a. Cases other than "b"	(a) Cases in which billing item(s) in the bill to the user are exclusively used by a single contracting carrier and in which NTT conducts billing and collection	Per billing item	<u>¥24.50</u> <u>¥24.33</u>	Applied to the specified long-distance carrier
				Monthly charge	An amount equivalent to <u>0.15%</u> <u>0.12%</u> of user charges pertaining to the service segment of a contracting carrier that are billed by NTT	

	this contracting carrier pursuant to Article 80 (Assumption of Accounts Receivable)		(b) Cases in which itemized charges in the bill to the user are payable to multiple contracting carriers and in which NTT conducts the following per call: accumulating data, calculating charges, determining the billing amount, billing and collection	Monthly charge	An amount equivalent to <u>3.9%</u> 4.0% of user charges pertaining to the service segment of a contracting carrier that are billed by NTT	Applied to mobile carriers and paging carriers
			b. Cases of call origination from public telephones of NTT (limited to cases in which the person required to pay the relevant charge is the user of the public telephone)	Monthly charge	An amount equivalent to 14.0% of user charges pertaining to the service segment of a contracting carrier that are collected by NTT	Applied to paging carriers.
(8) Expense for procedure related to providing address information concerning assumed subscribers	The expense required for procedures to provide subscriber information, etc. such as the subscriber line number, etc. and the name and address of a person to whom an invoice for NTT's user charges is sent by magnetic medium pursuant to Paragraph 1 or 2, Article 99 (Providing Subscriber Information to Contracting Carriers with Assumed Individual Subscriber Contracts)			Per inquiry	<u>¥8,959</u> <u>¥10,643</u>	Applied to contracting carriers with assumed individual subscriber contracts
				Daytime on weekdays		
				Daytime and nighttime on Sat/Sun & holidays		
				Per case	<u>¥4.81</u> <u>¥6.31</u>	
(9) Expense for procedure related to billing and collecting charges on behalf of other carriers	The expense required for the procedure related to billing and collecting user charges that should be billed and collected by a contracting carrier but are billed and collected by NTT in accordance with Article 81 (Billing and Collecting User Charges on Behalf of Other Carriers)	a. Cases in which user charges that should be billed and collected by a contracting carrier are for telephone service or ISDN service	(a) Procedures related to the exchange, etc. of billing information	Per billing item	<u>¥15.13</u> <u>¥14.02</u>	_____
			(b) Procedures related to billing, collection and response in case of nonpayment	Per billing item	<u>¥18.01</u> <u>¥18.14</u>	_____
		b. Cases in which user charges that should be billed and collected by a contracting carrier are for leased line service		Per billing	¥639	_____

(10) Expense for attendance	Expense required for attendance by the person designated by NTT	a. Cases other than “b,” “c” and “d”		Per case	An amount equivalent to the amount calculated by multiplying the work unit charge specified in 2.1.2.4 of 2.1.2, 2.1 (Expenses for Works) by the hours required for attendance plus an amount equivalent to the additional amount from among the basic work amount specified in the articles of agreement for telephone service (the latter amount shall be applied only in case a dispatch is required)	_____		
		b. When work relating to the installation of the equipment, etc. necessary for interconnection is carried out as specified in Item (2), Paragraph 1, Article 95-3 and when such equipment (excluding power and air-conditioning facilities) is moved into or out of the NTT communications building		Per case	Daytime on weekdays	<u>¥12,310</u> <u>¥11,008</u>	_____	
					Nighttime on weekdays	<u>¥14,335</u> <u>¥12,791</u>		
					Late at night on weekdays	<u>¥16,650</u> <u>¥14,827</u>		
					Daytime and nighttime on Saturdays, Sundays and holidays	<u>¥14,625</u> <u>¥13,045</u>		
					Late at night on Saturdays, Sundays and holidays	<u>¥16,940</u> <u>¥15,081</u>		
					c. When work relating to the installation of the equipment, etc. necessary for interconnection is carried out as specified in Item (2), Paragraph 1, Article 95-3 and when such equipment is connected to or disconnected from NTT's telecommunications facilities or power facilities within the NTT communications building			(a) Other than (b)
		Nighttime on weekdays	<u>¥14,590</u> <u>¥12,443</u>					
		Late at night on weekdays	<u>¥16,947</u> <u>¥14,424</u>					
		Daytime and nighttime on Saturdays, Sundays and holidays	<u>¥14,885</u> <u>¥12,690</u>					
		Late at night on Saturdays, Sundays and holidays	<u>¥17,241</u> <u>¥14,671</u>					
		(b) When the optical intra-office transmission line of a contracting carrier is connected to or disconnected from the NTT optical subscriber main		Per case			Daytime on weekdays	
					Nighttime on weekdays	<u>¥10,842</u> <u>¥9,746</u>		
Late at night on weekdays	<u>¥12,593</u> <u>¥11,298</u>							
Daytime and nighttime on Saturdays, Sundays and holidays	<u>¥11,061</u> <u>¥9,939</u>							

			distribution frame or the NTT optical tandem main distribution frame		Late at night on Saturdays, Sundays and holidays	<u>¥12,812</u> <u>¥11,491</u>	
		d. When confirmation and coordination with NTT is undertaken with respect to the contents of installation work in initiating the installation of the equipment, etc. necessary for interconnection as specified in Item (4), Paragraph 1, Article 95-3			Per case	<u>¥10,505</u> <u>¥10,293</u>	—
(11)Expense for survey on subscriber line conditions	The expense required for NTT to conduct a survey to provide information on line conditions (excluding converted line length and transmission loss of outside cable) pursuant to Item 1, Article 99-3 (Providing Information Concerning the DSL Line, Etc.)				Per line	<u>¥1,108</u> <u>¥1,086</u>	—
(12)Expense for survey on subscriber line accommodation status	The expense required to conduct a survey by NTT to provide information on the accommodation status pursuant to Item 2, Article 99-3 (Providing Information concerning the DSL Line, Etc.)				Per line	<u>¥697</u> <u>¥683</u>	—
(13)Expense for procedure for DSL line installation	The expense required when the contracting carrier installs the DSL line (limited to the function specified in (4), 1.1.2.1 (Subscriber Line Transmission Function), 1.1 (Access Charges), Table 1.				Per line	An amount equivalent to the contract fee specified in the articles of agreement for telephone service	—
(13)-2 Expense for DSL line accommodation status survey	a. The expense for an accommodation status survey, etc. in order to confirm whether the usage restrictions in terms of accommodation are met.				Per line	<u>¥757</u> <u>¥741</u>	—
	b. The expense required for a survey determining whether the relevant DSL line is a line subject to ex post measures and the name, etc. of the contracting carrier that uses the relevant DSL line pursuant to the provisions of Paragraph 3, Article 52 (Responsibility of Contracting Carrier to Identify Faulty Sections, Etc.).				Per line	<u>¥1,029</u> <u>¥1,008</u>	Applied to reporting carriers
(13)-3 Expense for survey on converted DSL line length, etc.	The expense required for NTT to conduct a survey of information on line conditions (limited to converted line length and transmission loss of outside cable).				Per line	<u>¥909</u> <u>¥891</u>	—
(14)Expense for procedure for carrier pre-subscription	The expense required to handle carrier pre-subscription.				Per change	¥23	—
(15)Expense for line condition survey for optical line facilities	The expense required for a survey when NTT provides information on line conditions of optical line facilities as specified in Article 99-6	a. The expense required for a survey on transmission loss or pulse measurement results of optical line facilities as specified in	(a) Basic amount	① Measurement at the user building	Per site per survey	<u>¥6,742</u> <u>¥6,606</u>	—
				② Measurement at the NTT communications building	Per site per survey	<u>¥776</u> <u>¥761</u>	—

	(Providing Information Concerning Optical Line Facilities)	Item (1), Paragraph 1, Article 99-6	(b) Additional amount	Survey on transmission loss or pulse measurement results	Per line per survey	¥883 ¥865	
		b. The expense required for a survey on the age of optical line facilities (excluding optical signal branch subscriber lines) as specified in Item (2), Paragraph 1, Article 99-6			Per section	¥1,772 ¥1,736	—
		c. The expense required for a survey on the estimated available timing of the optical subscriber line as specified in Paragraph 2 of Article 99-6			Per successful retrieval per number or per address	¥5 ¥20	
(16) Expense for procedure related to installation of optical line facilities	The expense required when a contracting carrier installs optical line facilities (limited to the function specified in “a,” (6), 1.1.2.1, 1.1 (Access Charges), Table 1 of the Tables of Charges or the optical signal interoffice transmission function specified in 1.1.2.5.3)			Per line	An amount equivalent to the contract fee specified in the articles of agreement for telephone service		—
(17) Expense for procedure related to installation of IP communications network line	The expense required when a contracting carrier installs the IP communications network line.			Per line	An amount equivalent to the contract fee specified in the articles of agreement for telephone service		—
(18) Expense for procedure related to installation of the subscriber line transmission function	The expense required when a contracting carrier installs a line using the subscriber line transmission function			Per line	An amount equivalent to the contract fee specified in the articles of agreement for ISDN service		Limited to cases in which interconnection is established at (1) or (2)3, Paragraph 1, Article 5 (Standard Points of Interconnection)
(19) Expense for procedure related to installation of the optical signal branch subscriber line	The expense required when a contracting carrier installs an optical signal branch subscriber line			Per optical signal branch subscriber line	An amount equivalent to the contract fee specified in the articles of agreement for IP communications network service		Limited to cases in which interconnection is established at (2), Paragraph 1, Article 5 (Standard Points of Interconnection) and in which the line subject to the additional charge in “(2)a,” 1.1.2.1.1.2 (Additional Charges), 1.1.2 (Charge Amounts), 1.1 (Access Charges), Table 1 is used
(20) Expense for procedure related to installation of the Optical intra-office transmission line	The expense required when a contracting carrier installs the optical signal intra-office line (limited to the function specified in (19), 1.1.2.11 (Other Functions), 1.1 (Access Charges), Table 1 in Tables of Charges)			Per line	An amount equivalent to the contract fee specified in the articles of agreement for telephone service		—

(21) Expense for POI survey	The expense required for a POI survey	a. When a contracting carrier installs a cabinet rack (limited to a unit whose installation space does not exceed one basic rack and that meets the installation standards separately stipulated by NTT) to install the equipment, etc. necessary for interconnection		Per case per communications building	<u>¥9,974</u> ¥10,663	—
		b. When a contracting carrier installs only the optical intra-office transmission line within the NTT communications building		Per case per communications building	<u>¥830</u> ¥975	—
(22) Information survey expense related to line facility survey on optical interoffice line	The expense required to provide the available timing of the optical interoffice line for the section designated by an applicant for interconnection and information related to the items designated in the Line Facility Survey Application by an applicant for interconnection			Per section	<u>¥2,376</u> ¥2,666	—
(23) Information survey expense relating to the preliminary inquiry concerning the optical subscriber line	The expense required to provide information concerning the optical subscriber line (limited to that relating to (7), Paragraph 2 of Article 10-2 (Preliminary Inquiry))	a. The expense required for a survey of available timing	(a) Providing information on the optical subscriber line (excluding NTT's indoor wiring already installed)	Per section	<u>¥4,658</u> ¥4,454	—
			(b) Providing information on NTT's indoor wiring already installed	Per section	<u>¥13,491</u> ¥13,219	—
		b. The expense required for a survey of transmission loss		Per section	<u>¥2,973</u> ¥2,978	—
(24) Work expense for self-undertaken work coordination, etc.	When an applicant for interconnection installs the equipment, etc. necessary for interconnection, the expense required for design related	a. The expense required for design related to installation of the equipment, etc. necessary for interconnection	(a) Cases in which an applicant for interconnection installs a cabinet rack for installation of the equipment, etc. necessary for interconnection	Per case per communications building	<u>¥53,699</u> ¥53,414	—

	to such installation, work coordination, confirmation of the results of the installation of the equipment, etc. necessary for interconnection and other related work		(b) Cases in which the equipment, etc. necessary for interconnection is connected to two or more types of the following NTT facilities: electric power facilities, clock signal supply equipment, or other telecommunications facilities	Per case per communications building	<u>¥36,976</u> <u>¥36,327</u>	
			(c) Cases in which the equipment, etc. necessary for interconnection is connected to one type of the following NTT facilities: electric power facilities, clock signal supply equipment, or other telecommunications facilities	Per case per communications building	<u>¥26,723</u> <u>¥20,858</u>	
			b. The expense required for confirmation of the results of installation of the equipment, etc. necessary for interconnection	(a) Cases in which an applicant for interconnection installs a cabinet rack for installation of the equipment, etc. necessary for interconnection	Per case per communications building	

			(b) Cases in which the equipment, etc. necessary for interconnection is connected to two or more types of the following NTT facilities: electric power facilities, clock signal supply equipment, or other telecommunications facilities	Per case per communications building	<u>¥9,111</u> <u>¥9,311</u>	
			(c) Cases in which the equipment, etc. necessary for interconnection is connected to one type of the following NTT facilities: electric power facilities, clock signal supply equipment, or other telecommunications facilities	Per case per communications building	<u>¥7,466</u> <u>¥7,659</u>	
<u>(25) Expenses for procedures for fixed radio customer premises equipment installation</u>	<u>The expenses required when a contracting carrier installs fixed radio customer premises equipment</u>			<u>Per fixed radio customer premises equipment</u>	<u>An amount equivalent to the contract charge specified in the articles of agreement for IP communications network service</u>	_____
<u>(25)(26) Optical distribution area information survey expenses</u>	<u>The expenses required when information on the range of an optical distribution area is provided</u>			<u>Per communications building</u>	<u>¥9,583</u> <u>¥9,497</u>	_____
<u>(26)(27) Expenses for procedures to receive an application for routing number registration work, etc.</u>	<u>The expenses required to receive an application for routing number registration work, etc. through a telecommunications line designated by NTT</u>			<u>Monthly amount</u>	<u>¥16,212,000</u> <u>¥6,559,560</u>	_____
<u>(27)(28) Expenses for survey of information on the</u>	<u>Expenses required for procedures to provide the same number</u>	<u>a. Expenses for the information provision system</u>		<u>Monthly amount</u>	<u>¥10,679</u> <u>¥10,588</u>	

same number relocation acceptance/refusal	relocation acceptance/refusal information	b. Expenses for information provision work	Per case per telecommuni- cations number	¥929 ¥910	
---	---	--	---	--------------	--

2.2.2.2 Expenses for Procedures Other than Expenses in Table 2.2.2.1

Classification		Unit	Remarks
(1) Expense for POI Survey	The cost required for a POI Survey (excluding cases in which the expenses for procedures specified in (21), 2.2.2.1 (Expenses for Procedures) are applied).	Per case	_____
(2) Expense for billing reconciliation	The cost required for conducting billing reconciliation at the request of a contracting carrier	Per case	_____
(3) Expense for information survey relating to the preliminary inquiry concerning the POI installation site, etc.	The expense required to provide information concerning the NTT communications building where a POI is to be installed, or concerning a conduit or cable tunnel between this communications building and the nearest manhole where work is possible, etc. designated by NTT, or concerning optical line facilities (including the optical intra-office transmission line) or a fixed radio communications network, etc. (excluding cases in which the expenses for procedure specified in (23), 2.2.2.1 (Expenses for Procedures) are applied).	Per case	_____
(4) Work expense for self-undertaken work coordination, etc.	When an applicant for interconnection installs the equipment, etc. necessary for interconnection, the expense required for design related to such installation, work coordination, confirmation of the results of the installation of the equipment, etc. necessary for interconnection and other related work (excluding cases in which the expense for procedures specified in (24), 2.2.2.1 (Expenses for Procedures) is applied).	Per case	_____
(5) Deleted			

2.2.2.3 Calculation Formula

Expenses for Procedures = Work Unit Charge × Work Hours
